

Roshambo Confederacy

Divide the entire grid into polyominoes (possibly including one-square monominoes). Each polyomino should contain exactly one digit, which is also the area of the polyomino. Polyominoes that contain digits in the same typeface may not touch on an edge, but may touch diagonally. Darken in the polyominoes that have a white digit. (There are three typefaces in this puzzle.)

Sample Puzzle:

3		2	2	5
2				
			3	
4	3			1

Sample Solution:

3		2	2	5
2				
			3	
4	3			1

1	5		2	4	5		3
3							5
		4		3		5	
4	4						
2			4				
		4				5	2
3			3				
			4				
					2	4
